-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maccabee (US5646907) in combination with DiMarzio et al. (US6069843). The Maccabee reference discloses the utilization of a system that transmits a microwave (see column 2, line 17) or laser (see column 2, line 13) pulses of varying frequency (see column 5, line 43) and monitoring acoustic vibrations to detect mines (see column 3, line 53) as recited in the claims. The difference between the Maccabee reference and the claims is that the claims recite the detection of landmines instead of water mines. The DiMarzio et al. reference teaches that it was well known in the art to utilize a system that transmits laser (see abstract) pulses and monitors acoustic vibrations to detect landmines. It would have been obvious to modify the Maccabee reference to be utilized on land as motivated by the DiMarzio et al. reference to enable the Maccabee system to detect landmines.
